

Business Description

DAVID GROUP since its founding in 2019 is a family-based cybersecurity company that creates software and electronic products to help Industries, Educational Institutions, Governments or Personal entity from global cyberattacks and stealth espionage. For the first time, DAVID GROUP is seeking external funding to increase business acceleration.

Active Products & Services

1. DAVID GROUP Managed Detection & Response
2. DAVID GROUP Cybersecurity Compliance Standards
3. DAVID GROUP Secure Native VPN
4. DAVID GROUP Cybersecurity Competency Improvement Program
5. Integrated IoTs and PV Solar Systems

Funding Allocation

DAVID GROUP is seeking debt-financing for the creation of domestic small medium-sized scan engine data centers and internet security service automation (ML/AI) to capitalize on specific opportunities from 2024 - 2025 against massive cyber-crimes attacking critical infrastructure described in the business plan section.

Projected Customers

Indonesia and ASEAN countries.

ASEAN has experienced decades of strong growth and is now on track to become, as a group, the fourth largest economy in the world by 2030.

Business Plan

1. DAVID GROUP plans to build a scanning engine data center in Batam SEZ, Indonesia (only 25 km to Singapore) in order to build a Self-Detection and Threat Response infrastructure. This is a significant opportunity because of the national mandate, which states the obligation to use domestic products as a top priority.
2. DAVID GROUP provides active solutions to neutralize and protect servers against massive online gambling malwares, which targets government and educational institutions throughout Indonesia for the last decade.
3. Instituting a cybersecurity education infrastructure that collaborates with the Ministry of Research and Technology with a maximum quota of 1250 people per semester (initial phase).
4. Approaching the President and the decision maker through products quality and organizing specific national cybersecurity expos
5. Certify software and electronic products at Indonesian Ministry of Industry, for example DAVID GROUP Managed Detection & Response, DAVID GROUP Cybersecurity Compliance Standards and DAVID GROUP Secure Native VPN. 
6. Creating other domestic opportunities in the field of digital/ internet security. 

Company Info

- Trademark : **DAVID GROUP**
- Founded : **May 27th, 2019**
- Based : **Indonesia**
- Initial Team : **11 people**
- Founder : **David Samuel Haloho**

Industries Sector

- **Cybersecurity & Internet Security**
- Education Technology
- Clean Energy

Our Advantage & Opportunity

- Transition new capital of Indonesia from Jakarta to East Borneo (IKN).
- Cheaper labor costs.
- Take advantage of the presidential mandate to prioritize and use domestic products.
- The Vice President of Indonesia-elect has mandated to increase the number of experts in the field of cybersecurity.
- Cybercrime cases, such as online gambling malware that has already inflicted damage on hundreds of thousands of endpoints within government digital infrastructure and educational institutions, present a significant opportunity for DAVID GROUP to make a national contribution to Indonesia.
- One of G20 members and the fourth biggest population, Indonesia is a promising place for technology companies.
- We have experience of direct confrontation in cyber warfare from countries that always spreading malware and 0-day exploit for the past 5 years.

Our Vision

- Impactful Indonesian multi-national cybersecurity company for better global cyber stability.
